25X1A

13 December 1955

MEMORANDUM FOR: Contracting Officer

SUBJECT : Specification of 9 $\frac{1}{2}$ " Continuous Printer Printing Drum.

25X1A

1. The specifications for the continuous printer printing drum were furnished by of Eastman Kodak in the letter of 2 December 1955, SAPC-2839, as requested in previous telephone conversation.

2. The earlier discussions were initiated to determine the feasibility of providing a protective edge on duplicate material from the B and C cameras. This edge is still desirable but the dimensions provided by indicate a possible loss of image area in the preparation of duplicate material. The attached sketch indicates the possible loss of image which may occur. The loss of any image area is felt to be very serious and should be prevented if at all possible.

3. It is recommended that Eastman Kodak be contacted to determine the feasibility of altering the printing equipment so as to insure the retention of all image area of the negatives from the B and C configurations.
